

# Haskore

Henri Lakk

# *Sissejuhatus*

- Haskore on Haskell'i moodulite kogum, mis võimaldab kirjeldada muusika objekte funktsionaalprogrammeerimise deklaratiiivses stiilis.
- Mõeldud (lääne) muusika loomiseks
  - Ei sobi helide genereerimiseks.
- Võimalik tõestada muusikaliste objektide omadusi.

# *Muusika objektid*

- Noodid
- Pausid
- Muusika objektide transformeerimine
  - Helikõrguse muurmine
  - Tempo muutmine
- Muusika objektide kombineerimine
  - Järjestiku
  - Paralleelselt

# *Helikõrgus (pitch)*

```
type Pitch      = (PitchClass, Octave)
```

```
data PitchClass = Cf | C | Cs | Df | D | Ds  
                | Ef | E | Es | Ff | F | Fs  
                | Gf | G | Gs | Af | A | As  
                | Bf | B | Bs  
    deriving (Eq, Ord, Ix, Show)
```

```
type Octave     = Int
```

- Kokkuleppeliselt A440 = (A,4)

# *Muusika*

Infixr 5 :+:, :=:

```
•
data Music = Note Pitch Dur [NoteAttribute]
            -- a note \ atomic
            | Rest Dur          -- a rest / objects
            | Music :+: Music  -- sequential composition
            | Music :=: Music  -- parallel composition
            | Tempo Int Int Music -- scale the tempo
            | Trans Int Music   -- transposition
            | Instr IName Music -- instrument label
            | Player PName Music -- player label
            | Phrase [PhraseAttribute] Music
            -- phrase attributes

    deriving Show

type Dur    = Float          -- in whole notes
type IName = String
type PName = String

# Väljundid

- MIDI (*Musical Instrument Digital Interface*) – reaalaajas ja faili kirjutamine
- CSound – Muusika, heli ja signaali töötlemise süsteem
- SuperCollider – reaalaajas töötav tarkvaraline süntesaator
- Synthesizer - audio failid, mida on renderdatud puhtas Haskell'i koodis
- Muusika notatsiooni väljundid puuduvad

# *Paigaldamine*

- Paigaldamiseks vajalik Haskell'i parseri generaatorit *Happy*
- `$ ./cabal install haskore`
  - Kompileerimisel palju hoiatusi

*Demo*
